

GRANSTECH

FORMERLY ANUGRAHA CASTINGS

STEEL THAT EXCEEDS EVERY EXPECTATION.

Precision machined steel castings for
critical industrial applications.

PLANT FACILITY / ORIGINAL PHOTOGRAPH

COIMBATORE / INDIA

01 / COMPANY OVERVIEW

Engineered for precision

Premier steel foundry and machine shop in Coimbatore, India.

GransTech (formerly Anugraha Castings) specializes in high-precision machined steel castings across complex geometries and specialized material grades for Oil & Gas, Valves, Pumps, Defense and Heavy Engineering OEMs.

250 MT

Installed monthly capacity

1,000 KG

Maximum single casting

1,000+

Active pattern portfolio

14 DAYS

Quick-ship program

40+

Certified alloy grades

20+

OEM customers

02 / INFRASTRUCTURE

Foundry at a glance

Operational metrics and casting capabilities stated on the website.

3,600 MT / YEAR

Installed annual capacity

Supporting recurring production lots and rapid prototype delivery.

250 MT / MONTH

Monthly raw casting output

Across CO2 and Airset moulding lines.

1,000 KG

Single-unit weight

Capability for complex heavy single-piece castings.

1,000+

Pattern portfolio

Extensive inventory across valves, pumps and defense.

250 YEARS

Team metallurgical exposure

Cumulative senior engineering and core moulding experience.

14 DAYS

Quick-ship turnaround

Dedicated fast-track priority team for urgent service orders.

03 / MATERIALS

Specialized metallurgical grades

High-integrity engineered alloys for pressure, corrosion and temperature demands.

NICKEL ALLOYS

Specialized alloy castings

DUPLEX STEEL

Corrosion-resistant grades

LOW ALLOY STEEL

Engineered low-alloy castings

MARTENSITIC SS

Martensitic stainless grades

STAINLESS STEEL

Stainless steel castings

CARBON STEEL

Carbon steel castings

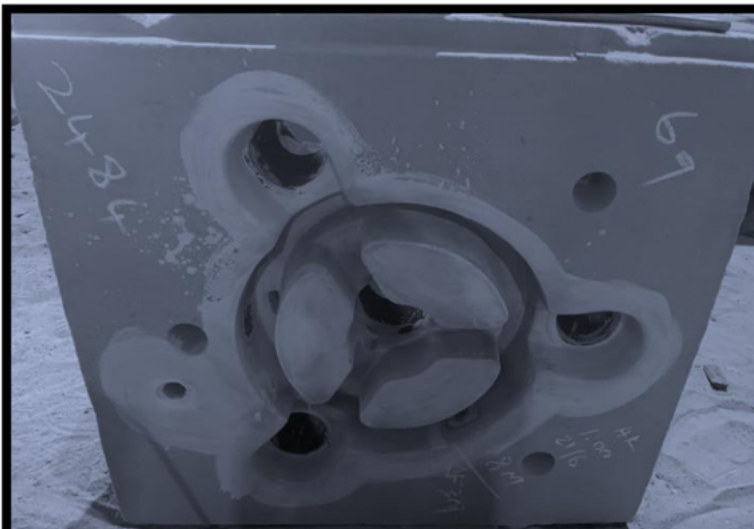

MOULDING: CO2 / AIRSET / SHELL* / INVESTMENT*

* Shell and investment processes supported through vendor partners.

04 / PROCESS FLOOR

Moulding to melting

Heat-to-ship production stages, inspection controls and equipment.

01 MOULDING

Resin sand / CO2 process; core and mould inspection against SO, heat and grade; coating Baume 60, hardness and pre-heat recorded.

EQUIPMENT

250 kW induction furnace; 750 kW / 1.5 MT unit listed from Dec 2025.

02 MELTING

Charge formulated per data sheet; spectrometer chemistry checks before/after alloy addition; immersion pyrometer temperature verification

05 / PROCESS FLOOR

Treatment & finishing

Controlled heat treatment, finishing and chemical surface preparation.

03 / HEAT TREATMENT

Bogie hearth furnace; dual thermocouple T1/T2 monitoring; 3-ton HT bogie and 60,000 L quench tank.

04 / POST-PROCESS

500 kg shot blasting unit, eight heavy grinding stations and WPS/PQR repair welding witnessed by TUV.

05 / PASSIVATION

Acid pickling and passivation, followed by demineralized-water rinsing and 100% surface sign-off.

TRACEABILITY THROUGH THE ROUTE

PO receipt & review > Planning & methods > Moulding & core > Melting & pouring > Heat treatment > Machining & NDE > Final inspection > Dispatch

06 / QUALITY

Chemical & mechanical labs

Laboratory and materials verification infrastructure documented on the website.

SPECTRO ANALYSER (Brand: SPECTROMAXx, Fe/Ni Based, 29 elements can be tested & CRM available for Carbon Steel, Low)

SPECTRO ANALYSIS

SPECTROMAXx Fe/Ni-based unit; 29 elements; certified reference materials.

UTM & IMPACT (Impact testing upto -196°C)

MECHANICAL TESTING

Universal tensile testing and Charpy impact testing down to -196 C.

HARDNESS

Brinell and Rockwell stations for heat-treated casting lots.

WET CHEMICAL ANALYSIS

Secondary verification of materials, alloys, slag and solution concentrations.

07 / QUALITY

Non-destructive examination

Documented NDE procedures and inspection methods.

WI-37 R1 / LIQUID PENETRANT

Fine surface discontinuities, cracks and pinholes.

WI-38 R1 / MAGNETIC PARTICLE

Surface and near-surface flaws in ferromagnetic castings.

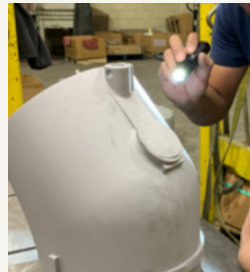

WI-39 R1 / ULTRASONIC

Internal volumetric flaw detection and wall thickness.

WI-40 R1 / RADIOGRAPHIC

Iridium-192 and Cobalt-60 isotope radiography.

WI-47 R0 / VISUAL

100% visual inspection before final release.

Current qualifications

The following are presented as active certifications or qualifications on the supplied website.

ISO 9001:2015

Quality management

PED 2014/68/EU

Pressure equipment

AD 2000

Merkblatt W0

API 20A

Group A, B and C

IBR

Well Known Foundry

NORSOK M650

Qualified

09 / STRATEGIC ROADMAP

Planned expansion

2025-2026 roadmap stated on the website. These items are plans, not current accreditations.

ISO 19443:2018

Nuclear sector quality management

ASME SEC III / QSC-810

ASME quality system certificate

ISO/IEC 17025

Testing and calibration laboratory

RCC-M

French nuclear casting supplier code

ISO 45001:2018

Occupational health and safety

ISO 14001:2015

Environmental management

NABL ACCREDITATION

In-house chemical and mechanical lab

25,000 SQ. FT

Expansion and in-house radiography

10 / PRODUCT PORTFOLIO

Valve & pump castings

Selected product photographs from the website gallery.

FLANGED GLOBE VALVE BODY

MACHINED CHECK VALVE BODY

HEAVY 3-WAY VALVE BODY

VOLUTE CASING PAIR

CENTRIFUGAL PUMP CASING

CLOSED PUMP IMPELLER

11 / PRODUCT PORTFOLIO

Specialized cast components

Additional product categories and full valve/pump range.

FLANGED VALVE ASSEMBLY

LARGE VOLUTE VALVE BODY

Y-PATTERN STRAINER VALVE

VALVE BONNET & YOKE

FLANGED PUMP HOUSING

MACHINED OPEN IMPELLER

12 / PRODUCT PORTFOLIO

Defense & heavy engineering

Precision castings for specialized and off-highway applications.

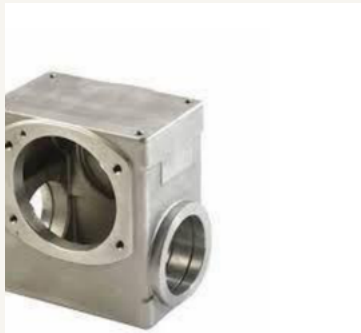

PRECISION CYLINDRICAL HOUSING

ARMORED VEHICLE ENCLOSURE

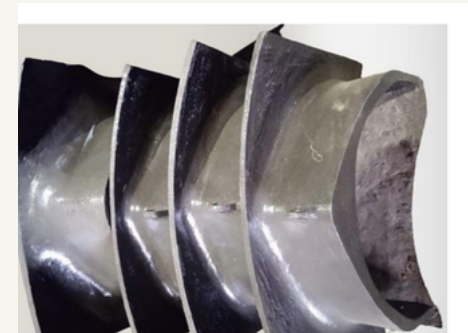

PRECISION GEARBOX HOUSING

MACHINED ALLOY ENCLOSURE

HEAVY PULLEY WHEEL

CRUSHER JAW WEAR PLATE

13 / MARKET

Sector contribution

Website-reported market breakdown and track record.

OEM customers

6

Qualifications

14 / CUSTOMER RECOGNITION

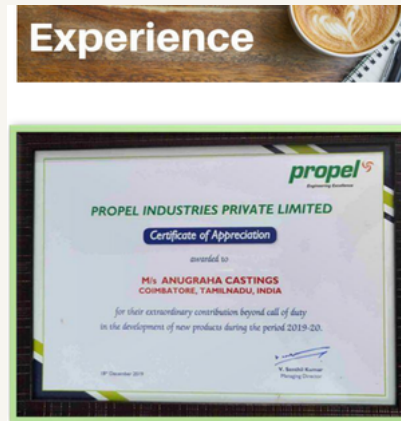

Appreciation from OEMs

Selected customer appreciation described on the website.

THERMAX LIMITED / JAN 2024

Strainer valve fab-to-cast project. Website reports first-attempt sample approval, six parts developed and no delivery delays.

PROPEL INDUSTRIES / 2019-20

Certificate of appreciation for extraordinary contribution to development of new product castings.

MAGTORQ / MAR 2023

Defense project quality supplier recognition. Website reports approximately 75 MT of steel castings supplied.

15 / ORGANIZATION

Engineering-led structure

The website shows roles and reporting functions but uses placeholder names, so no individuals are identified here.

LEADERSHIP

Managing Director / Vice President

OPERATIONS

Production Manager / Pre Production / Post Production
